With an aim to become the lowest-cost power producer in the world, Azure power – a **Solar Power Company** – is on its way to power the world at a reduced cost. They are already selling solar power in India on a long-term fixed price contract at prices that are, in many cases, at or below current alternative rates. Since its inception, they have managed to significantly reduce Solar Power Plant Costs by innovating in the field of engineering, design and procurement efforts.
