RA Power Solutions Provides repair and rebabbitting of Intermediate Shaft bearings. We were recently approached by a leading shipping company based in Vietnam. It was reported that the vessel's intermediate shaft and bearing were seriously damaged as it approached Kochi Port India. Our three technicians boarded the vessel and did their main observations. On removal of the Intermediate Shaft bearing excessive damage to the bearing seating area was observed. The bearing was Assembled by RA Power Solutions Technicians. The Intermediate Shaft was used to match all parameters, including the oil gap and blue matching of the bearing. We observed satisfactory performance of the Intermediate Shaft and bearing after assembly trials. For Your Repair of Intermediate Shaft and Damaged Intermediate Bearing, please contact us at rajshahani@rapowersolutions.com or info@rapowersolutions.com or call us at +91 9582647131 or +91 9810012383.
