Contact Person	Xtreme Machine
Mobile Number	9810322070
Email	support@xtrememachines.in

A Zero Halogen Cable Filler Machine injects filler materials into the spaces between conductors within LSZH (Low Smoke Zero Halogen) cables. These cables are used for safety reasons in buildings and places where smoke inhalation is a major threat. The filler material helps maintain cable shape, improves fire resistance, and reduces smoke emissions during a fire.
