Houston Systems is a DFMD Manufacturer in India, providing Door Frame Metal Detector solutions for entrance security, pedestrian screening and controlled-access environments. Our DFMD systems are designed to help organizations improve security screening at entry and exit points across corporate offices, factories, industrial facilities, educational institutions, hospitals, commercial buildings, warehouses, public facilities and other premises requiring controlled access.

We help businesses select a suitable DFMD Security System based on their entrance layout, pedestrian movement, screening requirements and overall security objectives. Depending on the application, buyers can evaluate factors such as detection zones, sensitivity adjustment, alarm indication, installation conditions and operational requirements.

As a DFMD Supplier in India, Houston Systems provides product guidance and technical assistance throughout the procurement process. Our support can include requirement assessment, product selection, installation assistance, commissioning guidance and

technical support.

Organizations looking for a Door Frame Metal Detector Manufacturer can contact Houston Systems to discuss their entrance-security requirements and identify a suitable solution for their facility.

Products & Solutions: DFMD, Walk Through Metal Detector, Multi-Zone DFMD, Entrance Security Systems and Security Screening Solutions.

Contact Houston Systems for product information, technical guidance and quotations.
