Digital Alpha Platform is a New York-based low-code data and platform engineering solutions company for investment, risk, and finance teams. We specialize in helping financial services firms lower risk, improve portfolio performance, and maximize ROI through modern data platforms, on-demand talent, and fractional CTO services.

Your firm’s future is in good hands. Our project engagements are led by the brightest minds from Wall Street and Fortune 100 companies like McKinsey, Goldman Sachs, J.P. Morgan, Deloitte, and Bloomberg.

Are you interested in accelerating AUM growth and increasing profitability? Recent studies prove that asset management companies that have strategically embraced technology are significantly outperforming the industry averages due to greater insight capabilities into their portfolios and markets.

Need faster data-to-insights? Position your firm to take advantage of opportunities in the market long before your competition. We can help you achieve 20-30x faster data-to-insights to improve risk-informed investment decision-making and gain distinct competitive advantages

in the marketplace.

Our clients accelerate growth through:

• Access to world-class on-demand talent
• Real-time competitive insights & intelligence
• Automation of manual processes & legacy systems
• Implementation of cloud technology – AWS & DATABRICKS
• Increased operational efficiency & lower cost of operations
• Automated data extraction for rapid risk assessment & decision-making

Simplify your business complexity. Our mission is to be a one-stop solution for deep financial technology, engineering talent, and industry expertise to move our customers to the top 2% of the digital maturity curve.
