Divine Metal and Alloy

Address Old No 2025 , New 2385 , Linghi Chetty Street
Chennai, Tamil Nadu 600001
India

Contact Person Sidharth Mehta
Mobile Number 9840836360
Email info@divinemetal.co.in

Divine Metal & Alloy, the Carbon steel is a sort of steel that essentially consists of iron and carbon, with modest quantities of different components. The expression "cold 60–70 sheets" alludes to a particular type of carbon steel known for its mechanical properties and application in cold-framing processes. The numbers "60-70" address the carbon content territory, demonstrating that the carbon steel contains around 0.60% to 0.70% carbon by weight.

One of the critical qualities of carbon steel is its high strength and toughness, which make it suitable for different modern applications. The expansion of carbon improves the steel's hardness and elasticity, giving it incredible mechanical properties. Accordingly, 60–70 sheets of carbon steel are normally used in the assembly of apparatus parts, devices, and parts that require high strength and wear resistance.
