Founded by leading finance professionals and entrepreneurs with extensive global experience and expertise in specialized Quantitative Finance and Risk Management domains and having an educational background from the best global institutions.

The Indian Institute of Quantitative Finance (IIQF) was established more than a decade back as a center of learning in the field of Quantitative Finance and Financial Engineering.

The institute was founded as an educational institution focusing on promoting education and training in the fields of Financial Engineering, Quantitative Finance, Risk Management, Investment Banking, Algorithmic Trading, Derivative Products, and several other areas of Modern Finance and Financial Technologies. It is the first institute in India that exclusively focuses on these super-specialized fields. IIQF conducts specialized open-house certificate courses and corporate training programs on advanced quantitative finance, risk management, financial technologies, financial modeling, and allied areas for corporates and individuals.
