Women commonly suffer a significant change in body weight after pregnancy, which can be upsetting. Sagging abdominal muscles and stretched abdominal skin can be effects of weight gain. To get rid of this, many people frequently adhere to a rigorous workout regimen and a healthy diet; yet, the results are unsatisfactory. In such cases, one might think about getting a tummy tuck. It is a cosmetic procedure that removes extra skin and fat from the abdomen to help flatten the sagging belly. At the renowned Lasercosmesis **Cosmetic Surgeon in Mumbai**, premier cosmetic surgeon Dr. Medha Bhave offers tummy tuck procedures. Go to the clinic to learn more.
