Punarvi Energies Ltd is a trusted solar EPC company based in Hyderabad, with a branch office across Telangana and Andhra Pradesh.

With over 12+ years of experience and 10,000+ projects completed, we specialise in rooftop solar for homes, businesses, and industries, along with on-grid, off-grid, and hybrid systems.

We also execute ground-mounted solar projects under the government's PM KUSUM scheme, helping farmers access solar subsidies.

Beyond solar panels, we offer solar water heaters and solar water pumps for residential and agricultural use. From site survey to net-metering and after-sales support, our team handles the entire process, so you get reliable, cost-effective clean energy without the hassle.
