mrtc.kolkata@gmail.com

The rooftop is one of the most neglected yet expensive areas of a home. Most homeowners have faced roofing problems directly impacted by rains causing severe damages in the ceilings, thus spoiling the look of expensive interior decorations. From small leaks to major cracking and development of micro holes, roofs suffer from water seepage and leakage that demand immediate attention. To help you out, Mitra Roof treatment Centre is serving for chemical waterproofing treatment of R.C.C. & R.B.C. roof for prevention of water seepage and leakage since last four decades. During our journey over these long years in this service, according to the market analysis reports it is observed that the existing waterproofing service are suffering from various aspects of efficiency, durability, and reliability. As a result demand for a reliable roof waterproofing as well as moisture and roof leakage proofing treatment is being constantly felt. EVER-SEAL is a new generation waterproofing chemical. It is an appropriate and balanced composition of mineral based Hydro-carbon, Non-Crystalline Waxes and Polymers having very low pour points.

The main advantages of using this chemical is that it enters the problem zone e.g. hairline cracks and porous areas of the concrete / RCC. It also nullify the absorbency of the surface and improves abrasion resistance with the elimination of the growth of algae. MRTC

is the only waterproofing organization in West Bengal licensed to use EVER-SEAL compound, having ISO 9001:2015 certification with IAS and IAF affiliation. This treatment holds written guarantee for Ten Years. By guarantee we mean, if any time within the guarantee period there is any complaint of seepage or leakage from any part of the roof, MRTC will carry out supplementary treatment free of cost what so ever.
