The MProfit story began in 2009 as a response to the lack of a good portfolio management solution in Indian markets. Growing organically as an organization focused on quality and customer service, we have cemented our place as a leading player in India's investment ecosystem. Having consistently kept up with investor preferences and regulatory changes in financial markets, we are solving an important problem for investors today and have earned their love & loyalty in doing so.

With MProfit, we strive to eliminate the need for unreliable tools & cumbersome spreadsheets that investors often rely on for manual entry & analysis of data. Our solutions are focused on automation and simplicity to help users achieve better investment returns.
