The clinic features state of the art equipment and trained staff that optimises the care of each patient. We understand that there are many factors that can affect health, including exercise, diet, environment and heredity. We are very proficient in our service. Our clinic has achieved eminence in this industry because of our client's belief and trust.

DiabetesTreatment - Diabetes mellitus, commonly known as diabetes, is a condition that impairs the body's ability to process blood glucose, otherwise known as blood sugar.

Kidney Stones - Hard deposits of salts and other minerals formed within the kidney or urinary tract are termed as Kidney stones. These kidney stones are also referred to as Nephrolithiasis or Renal Lithiasis.

Asthma - Asthma is a disease affecting the airways that carry air in and out of your lungs. It is a chronic disease in which a person's airways become inflamed and swell making it difficult to breathe

Vitiligo - Vitiligo is a skin disorder where white patches of skin appear on different parts of the body. It is a chronic condition where not only the skin gets affected but also the hair that is present in the affected area also turns white.

Migraine - Migraine is a condition caused due to specific neurochemical changes in the brain characterized by recurrent headaches usually on one half of the head.

Eczema - Eczema is an inflammatory skin disorder where people experience patches of red, dry and flaky skin on most of the areas like face, neck, upper chest, hands, feet and also behind the knees.

Sinus - Sinus is an inflammation or swelling of the tissue lining the sinuses. Healthy sinuses are filled with air, but when they become blocked and filled with fluid; germs grow and cause an infection.

Arthritis - Arthritis means inflammation of one or more joints causing pain and stiffness that worsens with age. Arthritis commonly occurs in the joints where a bone moves over the other bone.

Piles - Piles are also referred to as Hemorrhoids. They are a collection of swollen veins in and around the anal canal. They contain blood vessels, support tissue, muscle, and elastic fibers.

Thyroid - Hyperthyroidism and Hypothyroidism are two of the common types of thyroid. Hyperthyroidism means the excess production of hormone whereas Hypothyroidism means the thyroid gland doesn't produce enough hormones.

PCOS - Polycystic ovary syndrome (PCOS) is a common hormonal

disorder seen among women in their reproductive age. Women with PCOS produce higher than normal amounts of male hormones.

Joint Pain - Joint pain is a common complaint that affects people of all ages. The causes for joint pain can be an injury, an overuse injury, underlying condition such as arthritis, gout and infections.
