Welcome to Website Learners

At [Website Learners](#) we help people who are trying to create their own website, with the help of our easy-to-follow tutorial videos.

We created Website Learners as a place where anyone can quickly and easily learn about web design – simply, by watching a video.

Most of the tutorial videos on YouTube about creating websites are painfully long – many of them even two hours or more. This makes them hard to follow & complete the steps show in the video. We try to overcome this by showing you how you can do the same thing and have it up and running in 10-15 minutes.

It's much simpler and it's fast!

Our Story

We are a small but passionate team from Chennai, India. Back in 2015, we made a quick 5-minute tutorial for our blog readers on how to make a WordPress website. We had a lot of fun making the video, and hoped

it would help people to see how easy creating a website could be.

To our surprise, the video gained a lot of attention. It even became the top ranked search on YouTube India for “[how to create a website](#)”.
