This integrated and comprehensive laundry software can be used by dry cleaners, laundry business owners, customers, and delivery-pick up agents. SPEC INDIA's modern dry cleaning POS system consists of major modules such as user management, order management, store management, inventory control, and pickup-delivery management.

The fundamental objective of laundry management is to overcome the challenges of laundry firms by establishing an automated environment for laundry operations. This includes taking orders, maintaining records, scheduling delivery & pickup, and managing payment. The goal of laundry system software is to increase operational efficiency, lower cost, improve productivity, and effectively manage data throughout the system.
