Hardwood Charcoal / Lump Charcoal is great for tandoor, restaurants, cooking on your outdoor grill or fire pit! It is made from real hardwood firewood chunks which have been charred.No chemical binders or igniting agents. This type of charcoal releases high calorific power of large durability and uniform distribution of heat. It burns intensely and hot and supplies superior flavor for your grilled foods without any of the nasty chemical fumes or aromas which can come from industrial pressed composite charcoal briquettes.

Specifications:

Moisture Content: 4%-7% max

AS Trading Corporation which owns the brand Indian Charcoal having its head office at Nagpur has steadily grown to become one of the best quality charcoal manufacturer, supplier & stockist in central India. Since inception in year 2013 as a trader we have grown into the major player in charcoal business in central India. Looking towards the growth and demand, we entered into the manufacturing of wooden charcoal in Nagpur and Hyderabad simultaneously.

We manufacture charcoal using the best firewood grown on the private land without damaging the forest ecosystem. For more information about our products visit [here](#).

Charcoal is used for various purposes such as, industrial, MSME, Home utility. Our products are made for every specific purpose, we make sure that the charcoal have the correct specifications to suit every specific need. We make sure that the charcoal that we manufacture that are to be used in households are non-toxic in nature, with no smell, easy to ignite, long burning time and no smoke. Charcoal used in industries have minimum amount of moisture with high carbon content. The charcoal at our industries are hand picked for the

barbeque and tandoor and rest of the charcoal is graded using the grading machine which grades the charcoal into various sizes ranging from 10 mm to 70 mm which suits almost every industry. The Angeethi/Brazier charcoal we manufacture has no smoke, no smell, no spark, non-toxic in nature, easy to light, long burning time, economic and environmental friendly.

We keep a close eye on our quality and have strict quality control measures to make sure that we provide the maximum quality of product. We make charcoal using pyrolysis method which controls pollution upto 75% and produces best charcoal in the industry.

Our quality control is one of the reasons why we are regarded as one of the best quality charcoal manufacturers in the industry.
