Aqua Tech Service an ISO 9001:2000 certified company is engaged in sales and service of water purifiers for all the leading brands in India. We are in the field of servicing all brands of water purifiers in Indian market from last 15 years. We have more than 50000 satisfied customers all over MUMBAI. We have number of specialize expert in our team hence the customer satisfaction ratio is very high. We guarantee you that if you take our service you will be our next satisfied customer.

We sales water purifier of all leading brands in India. We do the annual maintenance contracts for services of all water purifiers. In Servicing we do Regular maintenance and need-based repair of all kinds and brands of water-purifiers including Alfa, Aquagard, Moniba, Ultragard, Kent - RO, Sure - RO, & MANY MORE BRANDS through Annual Service Contract with residential industrial UV & RO SYSTEM in Mumbai

Quality Policy

Aqua Tech Service us committed to achieve excellence in "Sales & Servicing of water purifiers." Though the process of continual improvement.

This responsibility and commitment is practiced and communicated by the top management through:

Ensuring professional standards and statutory and regulatory requirements are complied with

Implementation of a policy, which meets the ISO 9001:2000 Quality Management System

Ensuring staff interact with customers for providing complete turnkey solutions and have successfully commissioned which meet their needs and expectations

Also we are providing Electronic Surveillance System. As you are aware the security scenario in our city & country has hit the lowest ebb with lots of criminal activities & Theft on the rise. Even with security forces being in place it is humanly not possible to Detect or avoid crime totally .That's the reason we come out with E-Security system. I am glad to give our company details as below.

Service & fix The problem

Repair:

Do you have a Water purifier System or an R.O (reveres osmosis) system or any Aqua gard product, Security(CCTV) system, Telecom (epbx) which you purchased from a vendor who never came back after installation?

Well, that's common, and the reason is that manufacturers work through dealers who sell to resellers and finally reaching out to end user. The process is so long that the person, who is supposed to service you at the end, turns out to be someone who does not even know about the device. We are different. We are sales and also provide Service and repair. Thus we ensure that there are only experts in our company, meant for the job.

Value:

The value for money will be very high with us, as we believe in establishing a long term relationship based on continuous support and development. One repair call you give to us, and you get associated with us lifelong, only if you're willing to!

Cost varies depending on the analysis of the site. One visit to analyze the site costs Rs 350+tax only, and if other visits are needed the same is conveyed to you. Complete transparency is what we believe in.

Along with repair you can also choose to go for AMC of your system, combined with training.

AMC:

Want to have an assurance that there will be someone to serve you throughout the year? Want to be sure that your Water purifier an R.O(reveres osmosis) system, Security(CCTV) system, Telecom (epbx) is never jeopardized?

If that's the case, its Inception you come to, and our experts solve your problems. We provide Annual Maintenance Contract for various Water purifier systems . The contract terms are very clear and transparent.

Warranty:

We also provide warranty in some cases, where we find the products are in working condition. The same is dependent on our analysis of the site and usages of the respective products.

Costs:

Varies depending on site analysis. One thing we assure you that the costs will be much less than any other service company you'll ever find, considering the value provided; and the reason is that we are not a service company alone. A company which creates products themselves can sustain itself at low service rates as well, and that's what we do. But we provide high end and high quality support and service to you, directly from R&D team.
