The service of Acquaint Softtech Private Limited has impressed Nick for sure. That is why he has collaborated on his second project with us called SuperFi. Earlier we had also built a SAAS platform which he grew and eventually sold. For SuperFi, Nick wanted a mobile app built with React Native and a website. Thus, he hired four developers (two for React Native and MERN each), one QA tester, a DevOps engineer, and a project manager. And we are glad to say that Nick is on track with his project with the team he hired from us. If you are also looking for developing an MVP for your business idea, you can also benefit from our affordable MVP development service, just like Nick.
