[AIRA Euro Automation Pvt. Ltd.](#) is one of India's leading industrial valve manufacturers and automation solution providers, delivering high-quality flow control products for a wide range of industries. With a strong focus on engineering excellence, innovation, and quality, the company designs and manufactures reliable valve automation systems that improve operational efficiency, safety, and process control.

Our extensive product portfolio includes Ball Valves, Butterfly Valves, Control Valves, Plug Valves, Gate Valves, Globe Valves, Diaphragm Valves, Solenoid Valves, Pneumatic Actuators, Electric Actuators, Pneumatic Control Valves, Valve Accessories, and Complete Valve Automation Solutions. Every product is manufactured using advanced technology and undergoes strict quality testing to ensure dependable performance in demanding industrial environments.

AIRA Euro Automation serves industries such as Oil & Gas, Chemical Processing, Pharmaceuticals, Food & Beverage, Water & Wastewater Treatment, Power Generation, HVAC, Textiles, Paper & Pulp, Marine,

Mining, Cement, Steel, Petrochemicals, and General Manufacturing. Our products are engineered to deliver precise flow control, long service life, corrosion resistance, and low maintenance requirements.

Backed by an experienced engineering team and modern manufacturing facilities, we provide customized automation solutions tailored to specific industrial applications. Our commitment to continuous innovation, customer satisfaction, and international quality standards has helped us build long-term relationships with customers across India and global markets.

At AIRA Euro Automation, we believe in delivering products that combine performance, durability, and value. From standard industrial valves to complete automated valve systems, we offer solutions that help businesses improve productivity, reduce downtime, and optimize process efficiency.

Whether you require a single industrial valve or a complete valve automation system, AIRA Euro Automation Pvt. Ltd. is your trusted partner for reliable, high-performance flow control solutions backed by technical expertise, responsive support, and a commitment to quality.
