Craftsman Storage Systems [Pallet Racks](#) are made with a variety of features that may be added to meet changing storage needs and various warehousing standards. For the greatest warehouse performance, our pallet racks are made in-house. Pallet racks are primarily used to optimize storage capacity while facilitating simple access to products that are kept in storage. Because of its adjustability, our pallet racks are customized to fit the weight and dimensions of the pallets that are being stored. Pallet heights can be accommodated by adjusting the beams vertically along the frames. They are made to hold large weights and disperse it uniformly throughout the rack system.
