Fleek IT Solutions established in 2016 with a vision to offer premium, cost-effective, and game-changing software testing services to our clients. As an independent software testing company, we help them in delivering high-quality products at the most affordable cost that drives revenue and makes them more reliable and profitable.

We are a team of experienced and certified QA professionals and testers working hard to build a relationship of trust and transparency. We understand the significance of effective software test management due to increased complexities in testing applications, ever-changing business requirements, and time to market.

To support our aim of achieving greater market acceptance for all our projects, we use both commercial and open-source test management software, automation frameworks and build testing workflows directly into the product development life cycle to ensure complete verification and validation. Our software testing experts work closely with project stakeholders, reports directly to the clients, and ensure that our deliverable meets all quality standards.
