Our village approach to education ensures that students are exposed to an environment where they learn concepts through shared responsibility, which incidentally is the core philosophy we adhere to. The large international community consisting of international students and teachers, best in class amenities and the best international curriculum makes IVS one of the top international schools in Chennai. The Virtual learning experience (VLE) is a complete educational package that engages the students from early childhood 2+ to Grade 6 in online classes. Our online learning Management software and Virtual classrooms, an interactive portal, facilitates seamless onsite and online transitions for almost all grades, making us one of the leading and successful IB school in India.
