TapTap is a logistics technology platform that connects businesses and individuals with [transport service providers](#) across India. The platform enables users to compare transportation options, review pricing, select suitable service providers, and manage shipments through a single digital interface. TapTap supports parcel delivery, part load transport, full truckload (FTL) services, freight movement, shipment tracking, and logistics management solutions. By bringing shippers and transporters together, the platform helps streamline transportation planning, improve operational efficiency, and support reliable goods movement for businesses of various sizes.
