At TouchPoint, we're redefining visitor management, empowering you with innovative solutions that seamlessly combine efficiency, security, and user-centric design. Say farewell to the constraints of long queues and intricate procedures. Embrace a future where QR codes, integrated access control, and more work harmoniously to elevate safety and streamline operations at your facility.

A Contract Labour Management System helps organizations to automate the complete contract employee lifecycle. The software can be relied on to track, monitor and manage all the required details about the contract labour ranging from the onboarding to the final billing.

Material gate pass system ensures that organizations have full control and access to track and record all essential details for returnable and non-returnable material vehicles. The system maintains high security, uncompromised transparency, and improved efficiencies for all the material entering and exiting your premises.
